TECHNICAL SKILLS

JavaScript, jQuery, Backbone, Marionette, Handlebars, JSP, Jasmine, HTML, CSS, SASS, and GIT

EXPERIENCE

Bloomingdale's, New York, NY

UI Developer

Jan. 2016 – Current

PDP Redesign – *overhaul the Product Detail Pages of our website into a responsive/modern design*

- Currently working in a Lean Lab team to revamp our PDP by converting old code from JSP to reusable Backbone components supported by Jasmine tests and browser compatibility
- Responsible for the “add to bag” functionality which is deemed the most important part of the PDP
- Project’s estimated incremental demand for fiscal year 2017 is \$31.5M

Percent Off Implementation – *added the feature of showing the percentage off of sale price throughout the website*

- Spearheaded this project as both an experiment and production scaling. This feature is currently live on our website.
- Required to code this component into JSP as well as Handlebars to maintain consistency across all devices
- The browse/search component’s estimated incremental demand for fiscal year 2017 is \$7.2M

General Assembly, New York, NY

Web Development Immersive, Web Developer

Aug. 2015 – Nov. 2015

trainTrack – *A single-page full stack application that allows you to see where the NYC 1,2,3,4,5,6 and shuttle trains are in their current route sequence on a Google map in real-time.*

- Currently featured on the MTA website in the Apps Gallery under the Mobile/Web category
- Combined Node.js, Socket.io, Express, and JavaScript for production of this website
- Data was compiled from the MTA API then scrubbed and sorted to show the train locations using the Google Maps API
- The feed is set to update every 30 seconds so that users have the most up-to-date locations

Guggenheim Partners, New York, NY

Executive Assistant

Dec. 2011 – Aug. 2015

- Supported the Chairman of the Corporate Credit investments team along with three senior level executives, each the head of their respective group
- Performed daily tasks such as managed executive calendars, coordinated high-level meetings and conference calls, arranged travel (both domestic and international), edited corporate decks for client meetings, and maintained expenses

ADDITIONAL PROJECTS

GroupAway – *Discover, plan, and share trips with friends*

Nov. 2015

- Built this project in a two-person team at the TNooz Hackathon
- Utilized Node.js, Socket.io, SabreDevStudio API, Priceline.com API and deployed with IBM Bluemix
- Won IBM challenge for Best Bluemix creation
